Fiscal Policy

This collection of charts is intended to illuminate recent trends in the various funding sources for public schools: federal, state, and supplemental levies. Key findings include:

- Supplemental levies increased in real terms (adjusted for inflation and student growth) and grew relative to state funding
- The number of districts using supplemental levies has risen
- Federal school funding increased during the recession and then tapered off, starting in Fiscal Year 2013
- Total state funding increased significantly in FY2016, but remains below FY2007 levels
- General Fund revenue also remains below FY2007 levels, in inflation-adjusted per capita terms

Per Student General Fund School Funding (Inflation-Adjusted, Constant 2015 Dollars)

■ General Fund

Per Student Local Supplemental Levies (Inflation-Adjusted, Constant 2015 Dollars)

■ Supplemental Levies

Federal School Funding per Idaho Student (Inflation-Adjusted, Constant 2015 Dollars)

■ Federal

Per Student School Funding (Inflation-Adjusted, Constant 2015 Dollars)

Awaiting supplemental levy data for FY2016

State Funds and Supplemental Levy Funds, as Percent of In-state School Funding (excluding federal funds)

Number of Idaho Districts with Supplemental Levies

Real General Fund Revenue Per Capita

Inflation-Adjusted, Constant 2015 Dollars

Inflation-adjusted General Fund revenue per capita is below pre-recession levels.
